

EasyLED Curve Bollard

Nautical Series, B9

PRODUCT OVERVIEW

The nautically inspired Curve Bollard provides pedestrian and parking area lighting with a seaside flair. The specially designed optics offer excellently controlled, uniform lighting ideal for a wide range of applications including parking areas, walkways and landscape accents.

The durable one-piece sand-cast aluminum housing is finished with a weather-resistant textured powdercoat finish providing years of service. The precision vandal-resistant, UV-stabilized polycarbonate optical lens produces a Type III distribution and protects the internal components. Available with an 18 Watt EasyLED array in three color temperatures (3000K, 4000K and 5000K), which produces up to 2,100 delivered lumens. Easily replaces 70-100 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems.
