

EasyLED Side Light Bollard B11E

PRODUCT OVERVIEW

The B11E Side Light Bollard delivers high performance illumination from a unique contoured form factor. The 20W light engine has fully shielded optics to eliminate LED source glare. The B11E offers uniform scaled design elements for exterior pedestrian spaces for walkway illumination and architectural accents to denote building entrances and points of interest.

The durable cast and extruded aluminium housing is finished with a weather-resistant textured powdercoat finish providing years of service. The precision vandal-resistant, UV-stabilised polycarbonate optical lens produces a Type V distribution and protects the internal components. The B11E comes with a 18 watt EasyLED Arrays and choice of three colour temperatures (3000K, 4000K and 5000K), which produce up to 340 delivered lumens. Easily replaces 70 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems.
