

# EasyLED Lighthouse Post Top Nautical Series, PB10

## PRODUCT OVERVIEW

The Lighthouse PB10Q Post Top Luminaire provides walkway and area lighting and complements our B10 Bollard. Opal LumaLens diffusers offers excellently controlled, uniform lighting. Clear Lens with white cone reflector provide wide spread distribution. Typical applications include pedestrian areas, walkways, and landscape accents.

The precision die cast aluminum housing is finished with a weather-resistant textured powdercoat finish providing years of service. The precision vandal-resistant, UV-stabilized opal polycarbonate optical lens produces a Type V distribution and protects the internal components. Multiple wattages available from 10-28 watt EasyLED Arrays and choice of three color temperatures (3000K, 4000K and 5000K), which produce 500-2,800 delivered lumens. Easily replaces 70-100 Watt legacy HID systems, with an energy savings of 80% or more versus comparable Metal Halide systems.

Shown with LumaLens

Designed to match our B10 Lighthouse Bollard
